Marlin® Firearms Introduces Their New XT Pro-Fire® Adjustable Trigger

Madison, NC – To compliment the launch of their new XT Series of bolt action rimfire rifles, Marlin has re-engineered their X7 Pro-Fire® trigger used on their centerfire rifles and adapted it for use in their new bolt action rimfire rifles. This new **XT Pro-Fire® Adjustable Trigger** is a serious trigger designed to optimize user experience, safety and accuracy. All XT Series rifles come standard with the new XT Pro-Fire Adjustable Trigger.

Marlin's new user-adjustable trigger system allows the shooter to customize the trigger pull weight between three and six pounds, while providing the ultimate crispness with zero creep. Everyone's trigger finger works a little differently, and the XT Pro-Fire Adjustable Trigger accommodates these differences to ensure a crisp, smooth pull every time for better accuracy.

This new XT Pro-Fire Adjustable Trigger features a trigger safety incorporated into the design which prevents the trigger from being pulled until the trigger safety is fully depressed for an added level of safety and confidence. The XT Pro-Fire Adjustable Trigger is also available on the XT-22 Youth Series rifles making them the perfect choice for the next generation of shooters and hunters.
